Brainstorming & idea prioritisation

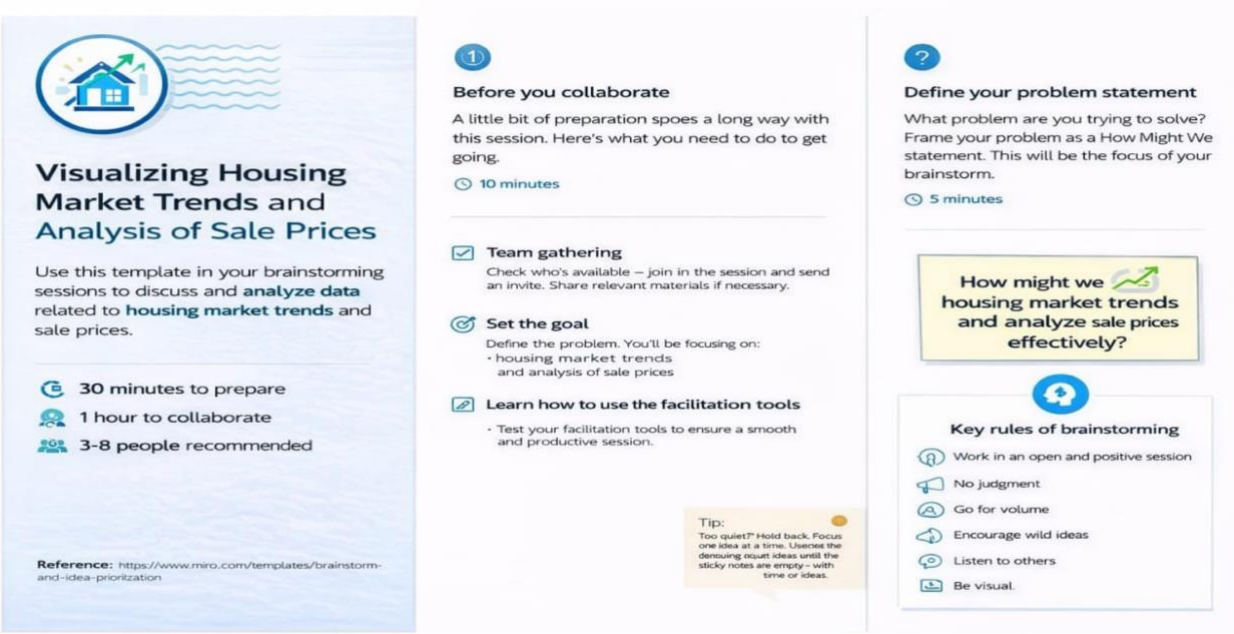
Date	31 January 2026
Team ID	LTVIP2026TMIDS36396
Project name	Visualizing housing market trends an analysis of sale prices and features using tableau

BRAINSTORMING & IDEA PRIORITISATION TEMPLATE:

This brainstorming and ideation prioritization exercise focuses on my project – Housing Market Trends (sales price and features analysis using Tableau).

The team generated ideas on how property features, location, size, and amenities influence house prices and demand. These ideas were grouped into themes and evaluated using an importance–feasibility matrix. High-priority ideas such as price trend dashboards, feature impact analysis, and city-wise comparisons were identified as both useful and achievable.This process helps keep the project focused and supports clear analysis of housing market patterns.

STEP1: Team Gathering, collaboration and select the problem statement



STEP-2: Brainstorm & Idea listening and Grouping

Visualizing Housing Market Trends and Analysis of Sale Prices

1 Brainstorm

Write down any ideas that come to mind about current trends in the housing market or factors affecting home sale prices.
