ASSIGNMENT 1

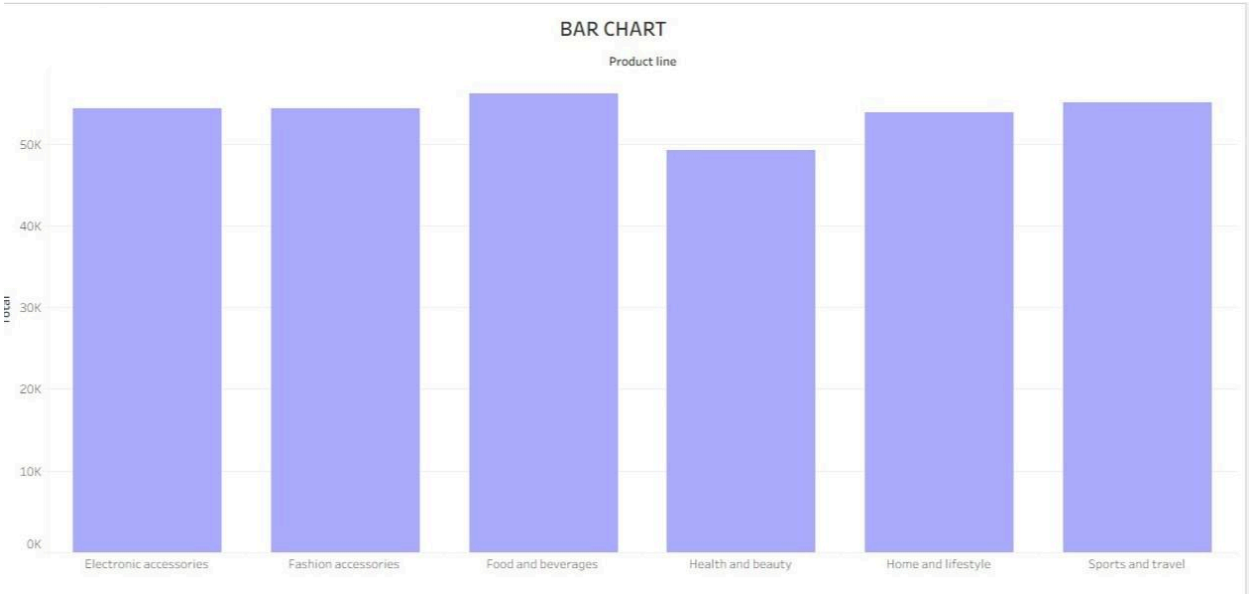
BAR CHRT

PROPOSE:--among different categories. The length or height of each bar is proportional to the value it represents

STEPS:--

- Open Tableau
- Open Tableau and connect your dataset.
- Open a New Worksheet
- Click on a new Sheet
- Drag Dimension to Columns (or Rows)
- Drag Measure to Rows (or Colum
- It will automatically create bars.
- Choose Bar Chart (if needed)
- Click Show Me → Bar Chart.
- Format & Edit Title
- Add labels (drag measure → Label).
- Change colors (drag measure → Color).
- Edit title (e.g., “Sales by Category”).

M.

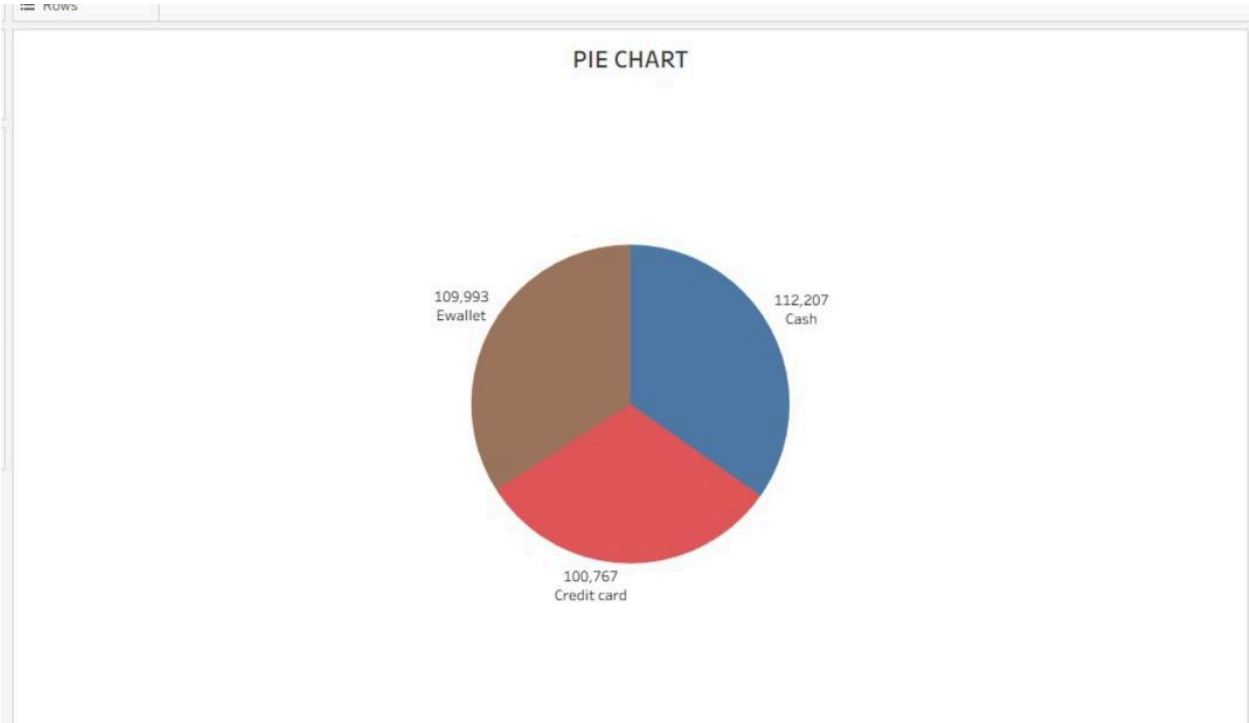


PIE CHART

PURPOSE:-- **A** pie chart is used to show the percentage or proportion of different categories in a dataset. It helps to easily understand which category has the highest and lowest contribution to the total

STEPS:--

- Open Tableau and connect to your dataset.
- Click on a New Worksheet.
- Drag the required Dimension (example: Payment) to the Marks area.
- Change the Marks type to Pie.
- Drag the required Measure. (exampleSales/Total) to Angle.
- Drag the same Measure to Label to show values or percentages.

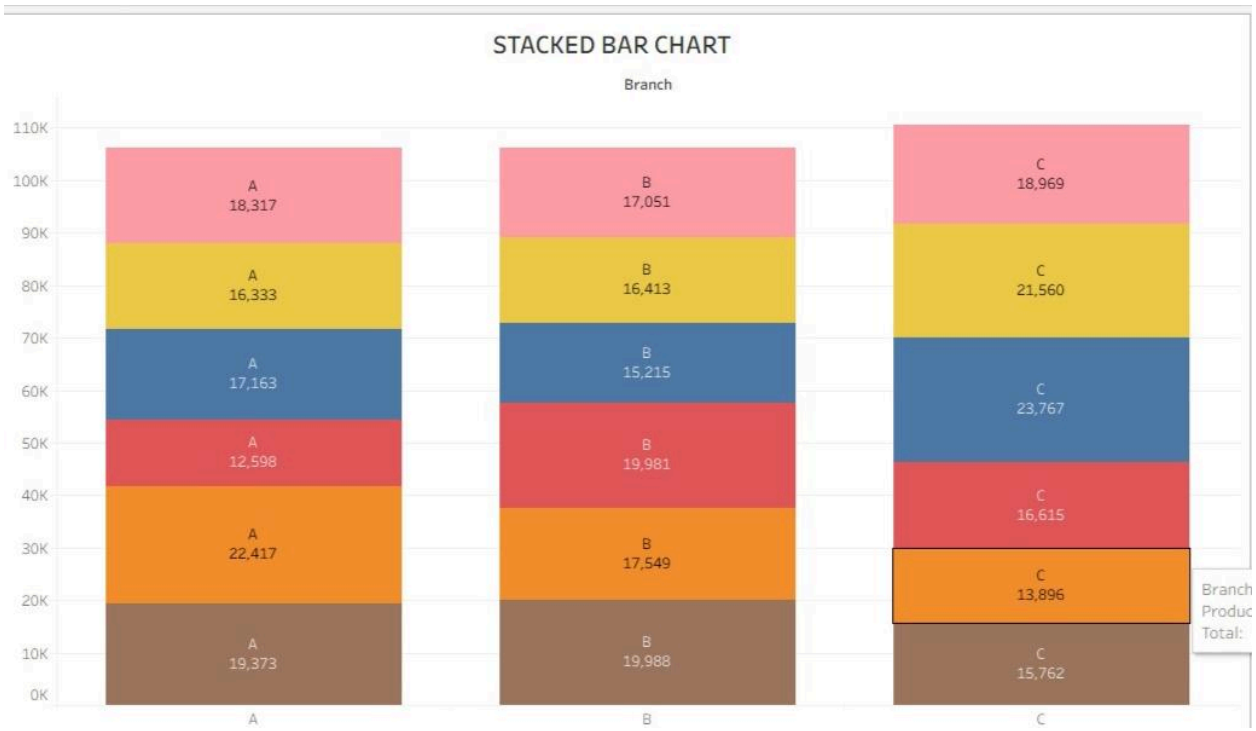


STACKED BAR CHART

PURPOSE : A stacked bar chart is used to compare total values across categories while also showing the contribution of each sub-category within the total.

SETUP:

- ❖ Open Tableau & Connect Data
- ❖ Load your dataset in Tableau.
- ❖ Open a New Worksheet
- ❖ Click on a new sheet.
- ❖ Drag Main Category
- ❖ Drag Branch (or Category) → to Columns.
- ❖ Drag Measure
- ❖ Drag SUM(Total Sales) → to Rows.
- ❖ Add Sub-Category for Stacking
- ❖ Drag Product Line (or Sub-Category) → to Color (Marks card).
- ❖ Add Title & Format
- ❖ Edit the title as STACKED BAR CHART and format Colors if needed.

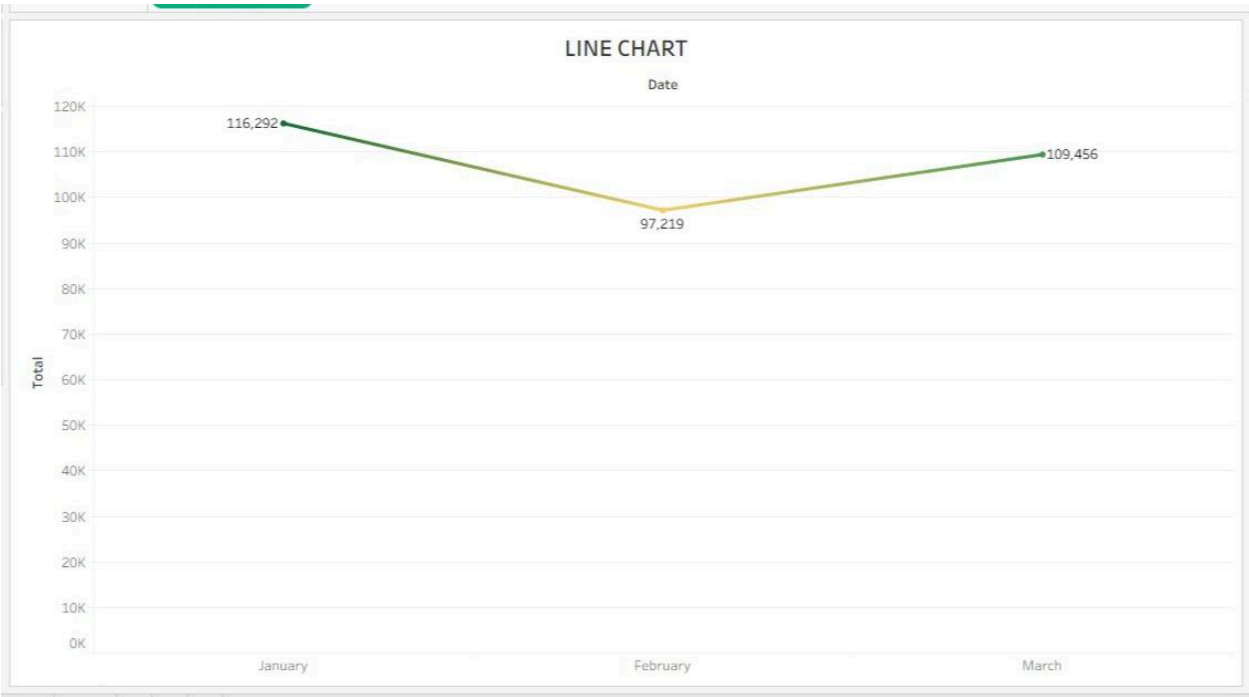


LINE CHART

PURPOSE: A line chart is used to show trends and changes over time. It helps to identify increases, decreases, and patterns in data

SETUP:

- Open Tableau & Connect Data
- Load your dataset.
- Open a New Worksheet
- Drag Date Field
- Drag Date → to Columns (change to Month/Year if needed).
- Drag Measure
- Drag SUM(Total Sales) → to Rows.
- Select Line Chart
- From Show Me, choose Line Chart (or change Marks type to Line).
- Edit Title & Format
- Rename title as LINE CHART and format if needed.

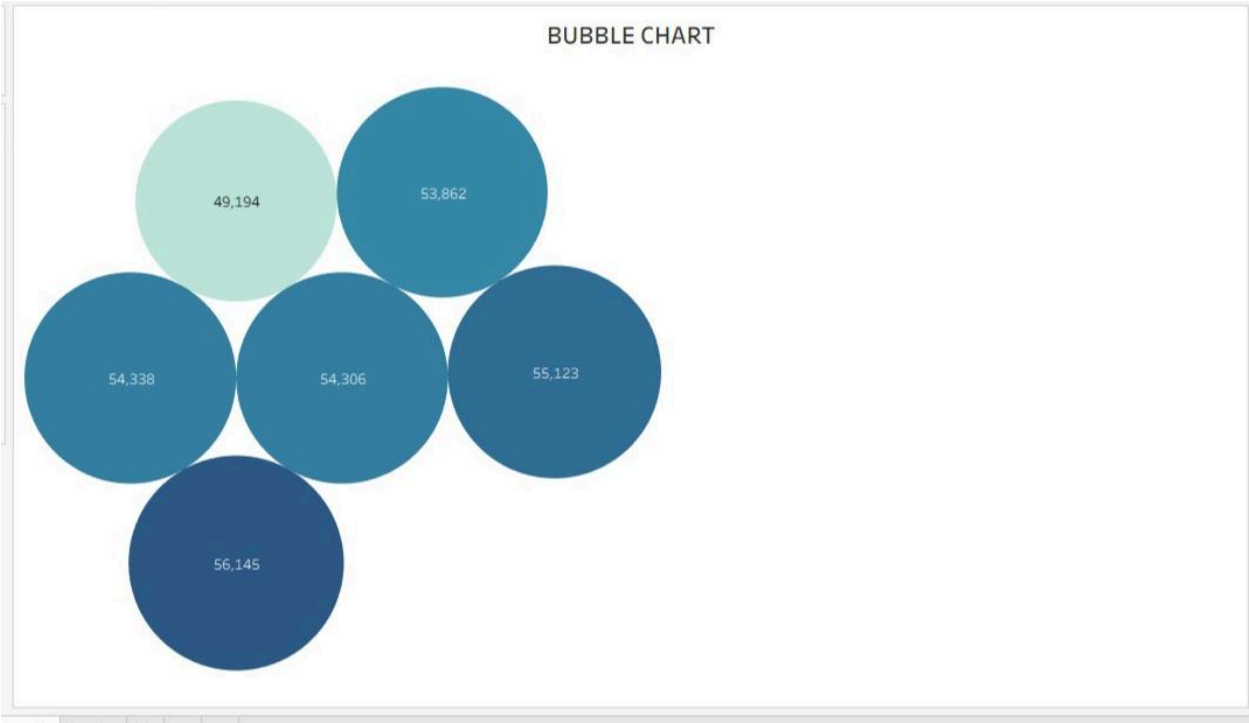


BUBBLE CHART

PURPOSE :A bubble chart is used to compare categories using circles where the size represents the value of data.

SETUP:

- Open Tableau & Connect Data
- Load your dataset.
- Open a New Worksheet
- Click on a new sheet.
- Change Marks Type
- Select Circle from Mark's card.
- Drag Category Field
- Drag Product Line (or Category) → to Detail.
- Drag Measure to Size
- Drag SUM(Total Sales) → to Size and also to Label (optional).
- Edit Title & Format
- Rename title as BUBBLE CHART and adjust bubble size/colors.



ASSIGNMENT 2

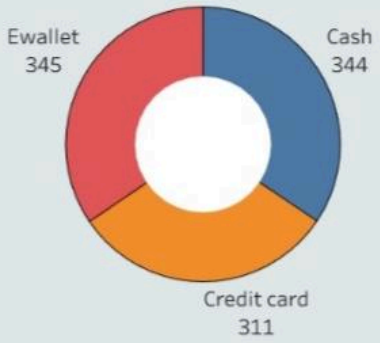
Donut chart :--

PURPOSE:A Donut Chart is used to show the proportion or percentage distribution of different categories from a total.It helps to easily compare parts of data like sales by category, payment method, or product line.

SETUP:

- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Create First Pie Chart
  Drag Sales (Total) → to Angle
  Change Marks type → Pie
- Duplicate the Measure
  Drag Total again → to Rows (so two pie charts will appear)
- Make Dual Axis
  Right-click on second SUM(Total) → Click Dual Axis
- Create Inner White Circle
- Select second Marks card
  Remove Category from Color
  Change color to White
  Reduce Size (this creates donut hole)
- Format & Edit Title
  Adjust size properly
  Rename title as Sales Distribution Donut Chart

Invoice by payments

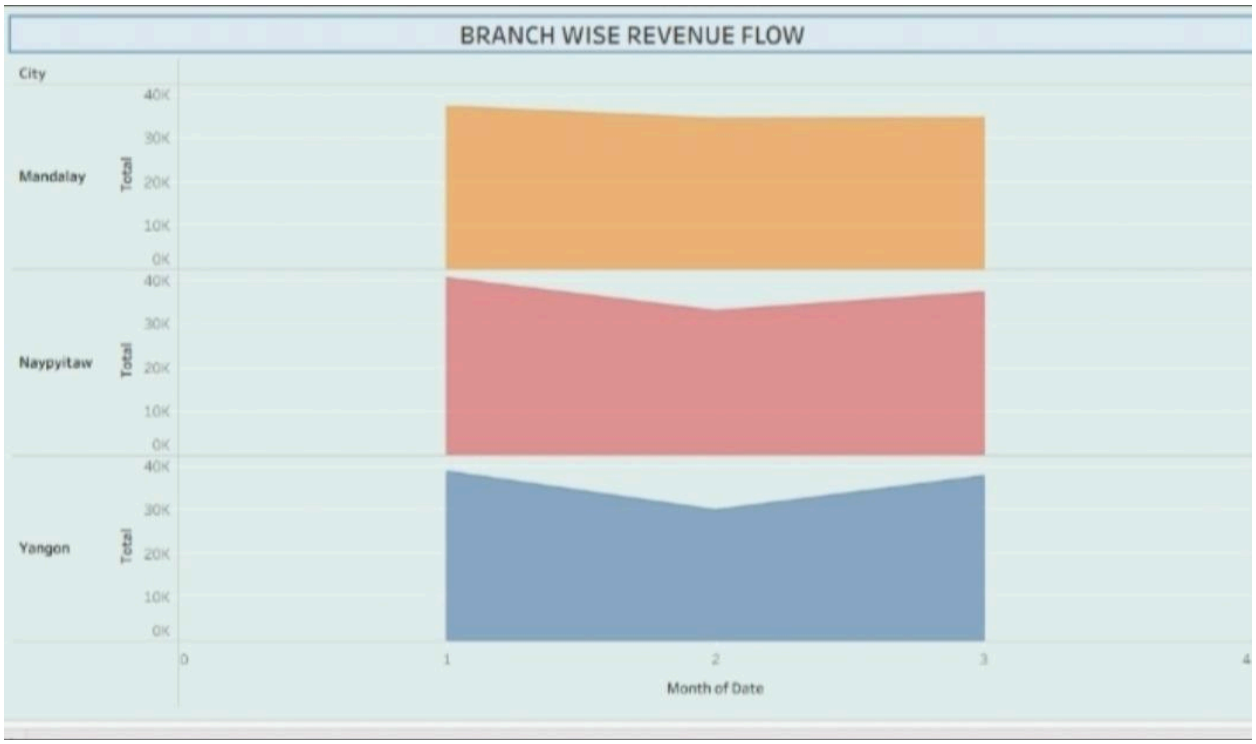


AREA CHRT

PURPOSE: An Area Chart is used to show trends over time and how values change continuously. It helps to understand growth, decline, and overall patterns in data like monthly sales or yearly profit. It also highlights the magnitude of change using filled color under the line.

SETUP:

- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Open a New Worksheet
  Click on a new Sheet.
- Drag Date Field
  Drag Order Date (or Date field) → to Columns
  (Change it to Month/Year if needed.)
- Drag Measure Field
  Drag Sales (Total) → to Rows
  Make sure it shows SUM(Sales).
- Change Marks Type
  In the Marks card, change chart type → select Area.
- Format & Edit Title
  Adjust colors if needed and rename title as
  Sales Trend Area Chart.

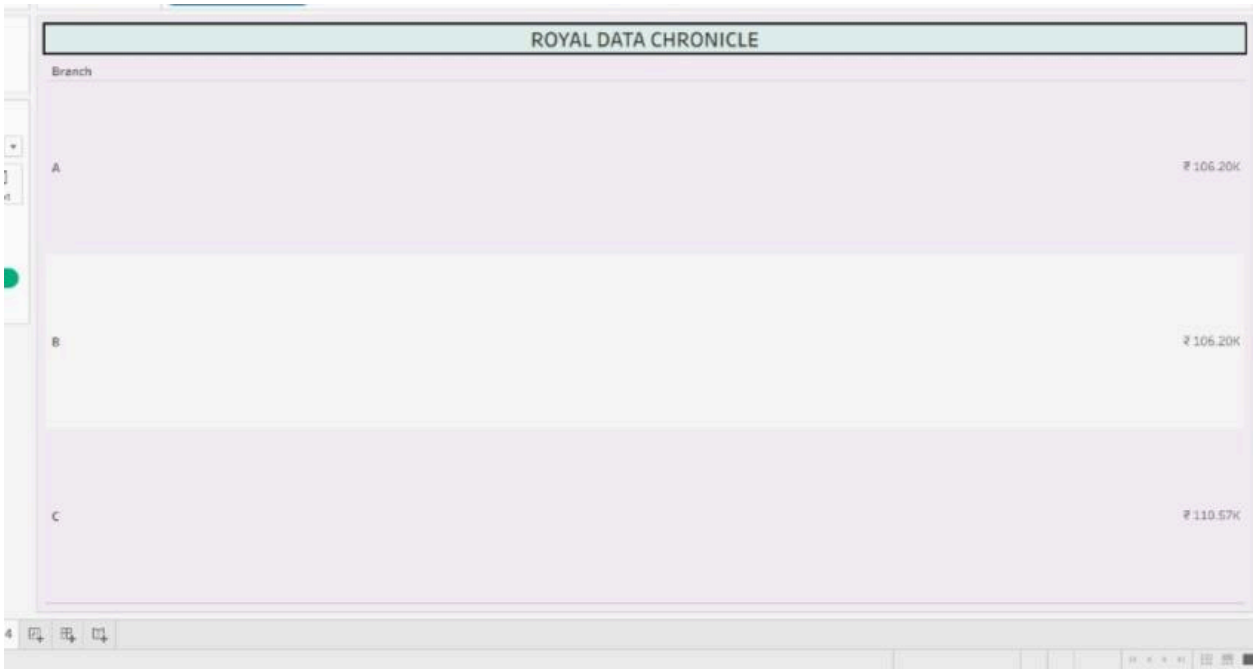


TEXT TABLE

PURPOSE :A Text Table is used to display exact numerical values in a simple table format. It helps to clearly compare data across categories using numbers instead of charts.

STUPE:

- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Open a New Worksheet
  Click on a new Sheet.
- Drag Dimension to Rows
  Drag Branch (or any category field) → to Rows.
- Drag Measure to Text
  Drag Total → to the Text option in the Marks card.
  Make sure it shows SUM(Total).
- Keep Marks Type as Text
  In the Marks card, select Text (if not selected).
- Edit Title
  Double-click the title and rename it (example: ROYAL DATA CHRONICLE).



Highlighted Table

PURPOSE: It is used to compare monthly sales across different product lines.Colors help to identify highest and lowest sales quickly.Dark green shows high sales, red/light color shows low sales.

STUPE:

- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Open New Worksheet
  Click on a new sheet.
- Drag Fields to Rows & Columns
  Drag Product line → to Rows
  Drag Date → to Columns
  Change Date to Month.
- Add Sales Measure
  Drag Total (Sales) → to Text
  Make sure it shows SUM(Total).
- Create Highlight Table
  Drag Total again → to Color
  Go to Show Me → Highlight Table.
- Format & Edit Title
  Edit the title as:
  Product Line Wise Monthly Sales
  Adjust colors if needed.

Product Line Wise Monthly Sales

Product line	January	February	March
Electronic accessories	18,831	17,363	18,143
Fashion accessories	19,345	19,010	15,951
Food and beverages	19,571	20,000	16,574
Health and beauty	16,383	14,602	18,208
Home and lifestyle	20,495	12,434	20,933
Sports and travel	21,667	13,810	19,646

1.

Word cloud

PURPOSE:: A Word Cloud is used to visually represent text data where the size of each word shows its importance or frequency.It helps to quickly identify the most popular or frequently occurring categories or terms in the dataset.

SETUP:

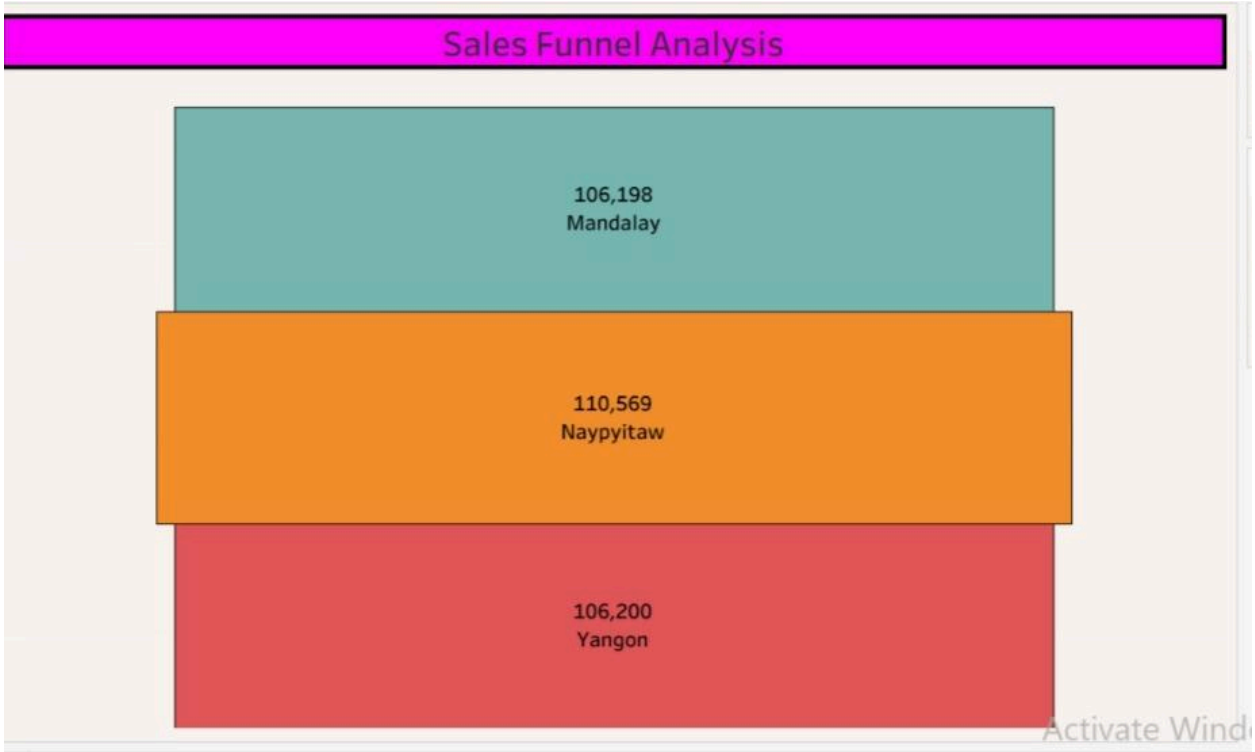
- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Open a New Worksheet
  Click on a new Sheet.
- Change Marks Type
  Go to the Marks card → Change the mark type to Text.
- Add Dimension
  Drag the text field (e.g., Product line) → to Text on Marks card.
- Add Measure for Size
  Drag the measure (e.g., Quantity or Sales) → to Size on Marks card.
- Format & Adjust
  Click Size and increase the slider.
  Add color if needed.

Funnel chart

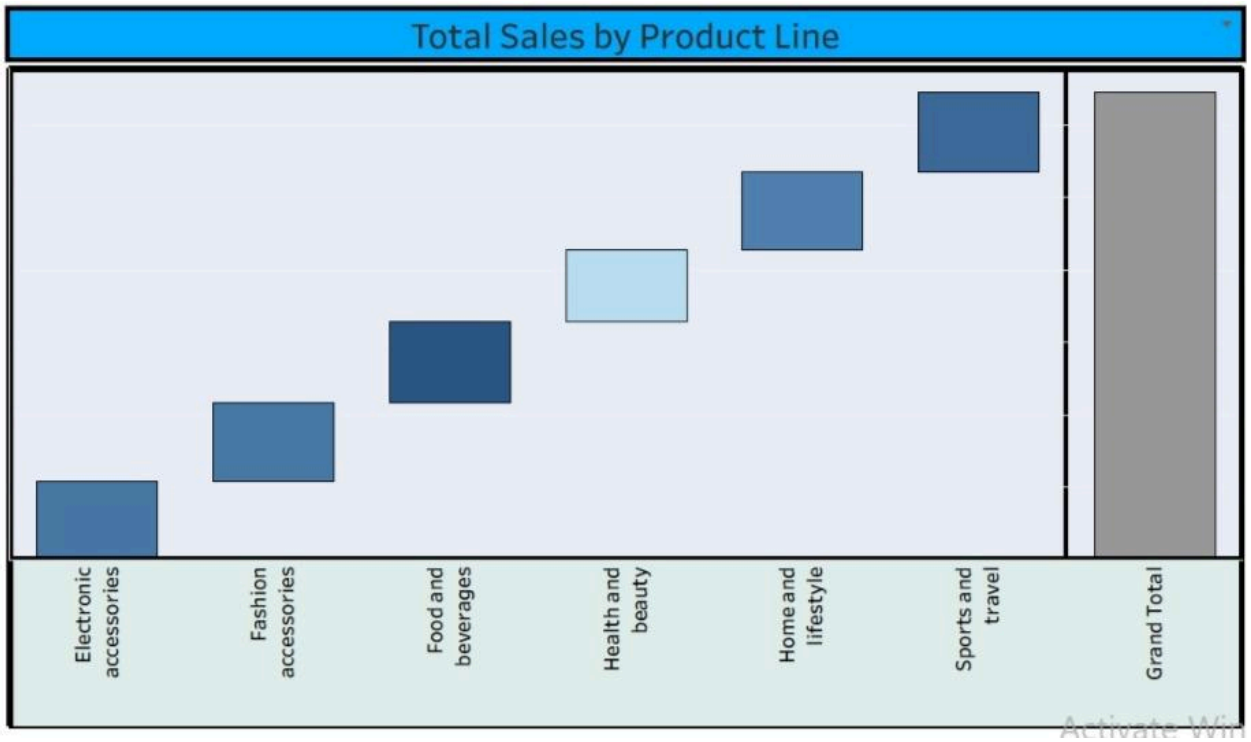
PURPOSE: Funnel Chart is used to represent stages in a process and show how values decrease at each stage.
It helps to identify drop-offs or performance differences between stages (like sales stages, leads, or cities).

STUPE:

- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- Open New Worksheet
  Click on a new Sheet.
- Drag Measure to Rows
  Drag Total (SUM) → to Rows.
- Drag Dimension
  Drag your category field (e.g., City) → to Color and Label in the Marks card.
- Change Mark Type
  Change Marks type to Bar.
  Sort values in descending order.
- Create Funnel Shape Effect
  Duplicate SUM(Total) in Columns.
  Make one negative (create calculated field: -SUM([Total])).



Waterfall

PURPOSE : A Waterfall Chart is used to show how individual values contribute to a total.
It helps to understand the cumulative effect of positive and negative changes in data.
STUPE:


- Open Tableau & Connect Data
  Open Tableau Public/Desktop and load your dataset.
- open new worksheet
  Click on a new Sheet.
- Drag Dimension to Columns
  Drag Product Line (or Category) → to Columns.
- Drag Measure to Rows
  Drag SUM(Total) → to Rows.
- Add Running Total
  Right-click on SUM(Total) →
  Select Quick Table Calculation → Running Total.
- Change Mark Type & Format
  Change Marks type to Gantt Bar.
  Drag SUM(Total) again → to Size.
  Adjust colors and edit title (e.g., Total Sales by Product Line).
